HENRY BROWN

4567 Main Street, Detroit, MI 48127 | (313) 555-0100 | henrybrown9408@gmail.com

Innovative, detail-oriented developer with strong expertise in software engineering, programming, and full-stack development. Adept at designing and implementing scalable solutions, collaborating effectively with cross-functional teams, and taking ownership of projects from conception to deployment. Committed to writing clean, efficient code and continuously improving technical skills to deliver high-quality software that drives business success.

EXPERIENCE

October 2020 – Present

Senior Software Developer | Apple Inc.

Working at Apple involves engaging in innovative product development, software engineering, and customer-centric design. Employees often work on cutting-edge technology such as iPhones, MacBooks, and software platforms like iOS and macOS. The environment emphasizes creativity, attention to detail, and delivering seamless user experiences. Collaboration and innovation are key, with opportunities to contribute to products used worldwide.

June 2016 – December 2020

Software Developer | Cisco Systems

At Cisco, the focus is on networking hardware, telecommunications equipment, and cybersecurity solutions. Employees work on developing and supporting networking infrastructure that powers the internet and enterprise communications. The role often involves problem-solving, technical expertise, and project management to help organizations improve their network security, reliability, and performance.

March 2014 – May 2016

Junior Developer | NEC Corporation

Working at NEC involves contributing to information technology, network solutions, and electronic devices. Employees often participate in developing software for telecommunications, public safety systems, and smart city infrastructure. NEC emphasizes technological innovation for societal advancement, offering roles that focus on research, system integration, and deploying technology for public and private sector needs.

EDUCATION

April 2012

Bachelor Degree in Computer Engineering | Greenwood University
